Find Official Emergency Information

SAMPLE TEXT — NOT APPROVED ADVICE. Prepare a short, verified list of official sources before smoke, fire, earthquake, or utility failure disrupts communications.

! WARNING — URGENT ACTION

Follow the responsible public agency. Evacuation, shelter, road-closure, and re-entry instructions come from public authorities—not a neighborhood radio net, group chat, social-media account, or this binder.

VERIFY BEFORE PUBLICATION

For every entry, a reviewer must locate the source through the agency's official website, confirm that the agency owns or endorses it, and record the check date. Confirm phone numbers by matching two official agency sources. Confirm radio frequencies, channel names, call signs, and coverage with the station or licensing authority. Remove any field that cannot be verified.

◎ **LOCAL INFORMATION — VERIFY BEFORE APPROVAL**

OFFICIAL SOURCES — VERIFY AND COMPLETE

Local emergency authority: _____
Official incident webpage: _____
Official phone / recorded line: _____
Verified by / date: _____ / _____

Broadcast station: _____
AM/FM frequency or channel: _____
Station call sign: _____
Responsible broadcaster/agency: _____
Verified by / date: _____ / _____

Find Official Emergency Information — continued

DURING AN INCIDENT

1. **Check** the official alert sent to your device and note its time.
2. **Confirm** details through a second official source when time and safety allow.
3. **Act** on current instructions. Do not wait for neighborhood confirmation.
4. **Share** the official message with its issuing agency and time; do not edit it.
5. **Recheck** because evacuation zones, road status, and protective actions can change.

EVALUATE A MESSAGE

- ☐ Issuing agency is named and matches a verified official account
- ☐ Location, action, and issue time are clear
- ☐ Links use the verified agency domain
- ☐ Later official updates have not replaced the message
- ☐ Unconfirmed information is labeled and not forwarded as fact

SOURCES

PLACEHOLDER: Cite each official agency, station, frequency/channel listing, call sign, phone number, and webpage used on the approved handout.
